

Nissan Retains Select 1 Transport For Technical Center Moves

Contract builds on relationship formed in 2002 involving engineering, testing, and concept vehicles.

TAYLOR, MI – **Select 1 Transport**, a global leader in specialized automotive transport, event marketing, and managed global logistics, announces **Nissan North America** has retained the company to handle vehicle moves for its North American Technical Center. The contract builds on an eight year relationship between the two companies.

Formalized on December 4, 2009, the agreement solidifies Select 1 Transport as the primary carrier for transportation of Nissan's engineering, testing, concept, and other vehicles for Nissan's North America Technical Center.

"This agreement is the result of nearly a decade of offering competitive rates, a proven record of excellent service, and professional driving teams." Said **Pat Evo**, Vice President and General Manager of Select 1 Transport.

Mr. Evo cited a 99.9% claim free delivery in 2008 and outstanding on-time load and delivery record over the eight years they have worked with Nissan Technical Center – North America as reasons they were awarded the contract.

"In the business of moving sensitive vehicles like these you can never underestimate the importance of establishing a solid track record. It requires a hands on relationship with engineering, design, marketing, and safety personnel," **Gary Carlson**, President and CEO of Select 1 Transport said.

"Many of Nissan's engineering and development vehicles are one of a kind and require that they are moved around the country to testing sites confidentially. Select 1 Transport has a fantastic reputation for keeping secrets in this industry," added **Rick Johnson**, Director of Business Development for Select 1 Transport.

In 2008, Select 1 Transport moved well over 1500 specialized vehicles for Nissan throughout the United States, Mr. Evo noted.

About Select 1 Transport:

Founded in 1997, Select 1 Transport focuses on **specialized automotive transport**, **event marketing**, privately owned vehicles, and **managed global logistics**. The company quickly expanded to become a single-source transportation and logistics resource, utilized by the world's leading automakers, advertising agencies, and exhibit builders.
